

Key information for investors

This Key Information Document (K.I.D.) is designed to provide essential information to investors in FFM European Selection Fund. This document is not intended to be a marketing document. The information contained in this K.I.D. are statutory disclosures which aim at helping you understand the legal framework governing investments in FFM European Selection Fund and the risks involved. You are recommended to read this K.I.D. carefully before making any investment decision.

FFM - European Selection Fund

ISIN : MU0603S00003

Management Company: Fisconsult Fund Management Ltd

Investment Objectives and Strategy

Management Objectives : The objective of the Fund is to achieve optimal long-term capital growth through an investment strategy based on the active management of a portfolio mainly invested in high-quality European stocks.

Investment strategy : The funds are invested in a portfolio composed mainly of large capitalization stocks domiciled in a member state of the European Union or the European Economic Area and, when purposely needed, in countries outside the European Economic Area. Stock selection is the key element of the management process and is based on an analysis including, but not limited to, the companies' business activity, governance, market positioning, financial structure, reinvestment capacity and future growth prospects. The Fund is invested without leverage.

Recommended holding period : The Fund is suitable for informed investors who understand equity market risks and wish to invest for a minimum period of 5 years. The Fund is dominated in Euro.

Frequency of purchase or sale : The Net Asset Value (NAV) of the Fund is calculated every Friday on a weekly basis. Subscriptions are allocated according to a NAV only if payment monies for the subscription are received on the working day preceding the calculation of that NAV. All redemptions must be notified at latest on the working day preceding the calculation of a NAV in order to be allocated to that NAV.

Profit allocation : Capitalization

Risk and Return Profile

The level of risk is calculated based on the volatility of the Fund over the medium term (i.e. based on the real fluctuations in its value over the last five years or on a simulation thereof, if the Fund was created less than five years before the time of computation of risks.) The volatility of the Fund may increase or decrease over time, which can eventually alterate its risk level.

This indicator represents the annual historical volatility of the Fund over a 5-year period. It is intended to help investors understand the uncertainties relating to losses and gains that may have an impact on their investment.

- The historical data used to calculate this indicator may not provide a reliable indication of the Fund's future risk profile.
- The risk rating associated with this Fund is not guaranteed and may vary over time.
- Category 1 does not indicate a risk-free investment.
- The Fund is classified as category 5 due to its exposure to equity markets
- For further information regarding the risks, please refer to the prospectus.
- The Fund offers no capital guarantee.

Key Information Document (K.I.D.)

Fees

The fees are used to cover the operating costs of the Fund, including marketing and distribution costs. These fees reduce the potential growth of investments.
